LTX STRATEGIC DRM DESIGN AND IMPLEMENTATION**I. PROJECT PURPOSE**

The purpose of this project is to introduce a budget-neutral amendment to the LTX contract supporting tax administrations develop better core functions, with special emphasis on the digitalization of tax processes in Central African Republic, Chad, Gabon, Rwanda and Senegal. The proposed amendment will:

- Allow LTXs to join HQ-led scoping missions, or undertake scoping missions under the direction of HQ, in their respective areas of expertise, to countries they would provide technical support when an agreement is reached with the authorities and a project under the GPFP is established. Their participation in these scoping missions is strategic given their hands-on support in the implementation of recommendations. This proposal will cover regional LTXs within the January-endorsed proposals: Strategic DRM Design & Implementation, Regional Digitalization, and Strengthening the Management of Tax Risks in Key Sectors in Central Africa.
